Orang Utan Island is located in exotic areas and eco-friendly trails at Bukit Merah Laketown Resort. The island is surrounded by the 7,000-acre Bukit Merah Lake. Previously Orang Utan Island was known as Pulau Panjang and has an area of 35 acres, of which 15 acres have been used as a research center for orangutans which are increasingly threatened with extinction.

The aim of this educational program is to raise public and student awareness of the need to conserve endangered species, particularly orangutans.
